#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Objections***

2. Claim 4 is objected to because of the following informalities: On line 5, delete “rotor’s rotary”. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang (US 5,925,963). Yang (Fig.3) teaches a motor comprising a casing 10 of magnetic material for housing a rotor (Fig.8) and stator coil (inherent, around poles 101 in Fig.1) wherein facing side surfaces of the casing have openings 103 (Fig.1); magnetic plates 120 closing the openings; the magnetic plates thinner than the thickness of the material of the casing (Fig.3).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yang. While Yang does not disclose that the magnetic plates are made of permalloy magnetic material, per se, this would have been obvious to one of ordinary skill since it has been held to be within the general skill of a worker in the art to select a known material such as permalloy on the basis of its suitability for the intended use of a magnetic plate as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

***Allowable Subject Matter***

7. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art fails to teach or suggest magnetic plates provided with an extended portion and a spring for transmitting a force in the motor axial direction wherein the extended portion extends from a side surface of the casing and is bent along the bottom until it reaches the end of the shaft of the rotor, the spring being made by cutting and raising a part of the extended portion.

***Conclusion***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Burton S. Mullins whose telephone number is 571-272-2029.
